

UP-DATE ON SHEET CHURCH CLOCK

On Tuesday (5 June) the Sheet church clock was examined by a firm of church clock repairers (Gillett and Johnston). They think that the problem is in the transmission and that the gearing needs to be taken apart and thoroughly cleaned. They manually moved the mechanism from the clock and felt resistance in the gearing, which they thought could be caused by dirt.

They are preparing a quote for the clock's repair and have promised to get back to us as soon as possible. We hope to have it working again before St Mary Magdalen's 150th celebrations.
